a
Reliability trend (ECE = 0.023)
Observed accuracy
Mean predicted confidence
b
Abstention curve
Accuracy of retained positions (%)
Least-confident positions removed (%)
97.8
85.1
full temporal
weighted recovery (64.6%)
c
Confidence of correct vs incorrect predictions
correct
incorrect
Positions
Model confidence (max predicted probability)
d
Per-chain abstention fraction
Cumulative fraction of chains
Positions abstained per chain (fraction)
41% never reach 90%
median chain: 85%
26% of chains need
< 30% abstention
